DETAILED ACTION

Claims 18-24 and 26-46 are pending in the present application.

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 2/25/08, 2/29/08, and 4/21/08 have been considered by the examiner. Forms 1449 have been signed and returned with this office action.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-20, 22-24, 26-36, 38-46 are rejected under 35 U.S.C. 101 because the MPEP 2106 states:

The claimed invention as a whole must be useful and accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." **> State Street Bank & Trust Co. v. Signature Financial Group Inc., 149 F.3d 1368, 1373-74, 47 USPQ2d 1596, 1601-02 (Fed. Cir. 1998).< The purpose of this requirement is to limit patent protection to inventions that possess a certain level of "real world" value, as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96 (1966); In re Fisher, 421 F.3d 1365, 76 USPQ2d

1225 (Fed. Cir. 2005); In re Ziegler, 992 F.2d 1197, 1200-03, 26 USPQ2d 1600, 1603-06 (Fed. Cir. 1993)).

The claimed invention lacks patentable utility because determining the function of the invention, that is, what the invention does when used as disclosed (e.g., the functionality of the programmed computer – or in this instance the functionality of the data processing unit or an intended result of the processing). (Arrhythmia, 958 F.2d at 1057, 22 USPQ at 1036, “It is of course true that a modern digital computer manipulates data, usually in binary form, by performing mathematical operations, such as addition, subtraction, multiplication, division, or bit shifting, on the data. But this is only how the computer does what it does. Of importance is the significance of the data and their manipulation in the real world, i.e., what the computer is doing.”).

Based on the claim language it is unclear the intended purpose of the invention.

Allowable Subject Matter

Claims 21 and 37 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. This would give the purpose and intent to the claims.
